Contents

1. Mileage log sheet (printable)
2. Mileage Allowance Relief (MAR) - plain-English how-to
3. AMAP rates 2026/27 + worked MAR example (employer 45p vs 55p)

1. Mileage Log Sheet - 2026/27

Name: _____ Vehicle (reg / type): _____

Employer / business: _____ Tax year: 6 April 2026 - 5 April 2027

HMRC AMAP rates (from 6 April 2026)

Vehicle	First 10,000 miles	Over 10,000
Cars and vans	55p	25p
Motorcycles	24p	24p
Bicycles	20p	20p
Passenger (cars/vans)	5p per mile	5p per mile

Source: GOV.UK. Template only - not tax advice. Ordinary home-work commuting is usually not business mileage.

Journey log

Date	From	To	Purpose (business)	Miles	Pass.?

Page subtotal (miles): _____ Year-to-date business miles: _____

2. Mileage Allowance Relief (MAR) - How-To

LOUD AND CLEAR: THIS IS NOT TAX ADVICE. Check GOV.UK or a qualified adviser before claiming.

When does MAR apply?

MAR may apply if you use your own car, van, motorcycle or bicycle for business journeys (not usually ordinary home-to-work commuting) AND your employer pays you less than the HMRC Approved Mileage Allowance Payment (AMAP) rates - or pays nothing.

If your employer already pays at or above the approved rates for those miles, there is typically no MAR to claim on those miles.

Relief is on the shortfall - not cash of the full AMAP

MAR is NOT cash equal to 55p times every mile. It is tax relief on the difference between what HMRC's approved amount would be for your business miles, minus what your employer already paid you as mileage allowance for those miles.

Example idea: if the approved amount is GBP 550 and your employer paid GBP 450, the shortfall is GBP 100 - relief relates to that shortfall (through lower taxable income), not a GBP 550 cheque from HMRC.

How people usually claim

* Employee not otherwise in Self Assessment: often form P87 (claim tax relief on employment expenses), if you meet HMRC's criteria.

* Already complete a tax return: claim via Self Assessment.

Always follow current GOV.UK instructions - processes and thresholds can change.

Keep good records

Keep a mileage log (date, from, to, business purpose, miles), notes of employer payments (payslips, expense reports), and enough detail to show journeys were business.

Checklist

- ☐ Own vehicle used for qualifying business miles
- ☐ Employer paid below AMAP (or nothing) for those miles
- ☐ Log kept for the tax year
- ☐ Shortfall calculated (approved amount minus employer MAPs)
- ☐ Claim via P87 or Self Assessment as appropriate
- ☐ Re-checked GOV.UK before submitting

3. AMAP Rates 2026/27 + Worked MAR Example

Period: 6 April 2026 - 5 April 2027. Source: GOV.UK. Not tax advice.

Rate table

Kind of vehicle	First 10,000 miles	Over 10,000
Cars and vans (incl. electric/hybrid)	55p	25p
Motorcycles	24p	24p
Bicycles (incl. EAPCs)	20p	20p

Passenger payments (cars/vans only): 5p per passenger per business mile (fellow employee; journey also work for them). No relief if you receive less than 5p or nothing for passengers.

Note: For tax years up to and including 2025/26, the car/van first-10,000 rate was 45p. From 6 April 2026 it is 55p. Motorcycle 24p and bicycle 20p are unchanged.

Worked example - employer 45p vs HMRC 55p

Scenario (illustrative): Car, 1,000 qualifying business miles in 2026/27 (all within first 10,000). Employer pays 45p per mile. HMRC approved rate is 55p.

Step	Calculation	Amount
A. Approved amount (AMAP)	1,000 x 55p	GBP 550
B. Employer payments	1,000 x 45p	GBP 450
C. Shortfall (MAR basis)	A minus B	GBP 100

Plain English: you already received GBP 450 from your employer. The GBP 100 shortfall is what Mileage Allowance Relief is about - tax relief on that gap, not a cash payment of the full GBP 550. How much tax you get back depends on your own tax situation. This pack does not calculate your personal refund.

If the employer paid 55p or more for those miles, the shortfall is usually GBP 0. If miles go over 10,000, use 25p for car/van miles above 10,000 when working out the approved amount.

Same example at other employer rates (1,000 miles @ 55p approved)

Employer rate	Pay for 1,000 mi	Approved	Shortfall
0p (nothing)	GBP 0	GBP 550	GBP 550
40p	GBP 400	GBP 550	GBP 150
45p	GBP 450	GBP 550	GBP 100
55p	GBP 550	GBP 550	GBP 0
